Summary

I have 3+ years of experience building web applications using mostly javascript libraries and frameworks, other times I use ASP.NET . I find building of software interesting, intriguing and relatively easy. I am currently learning react expo for mobile applications. So far, it's been good to work on the projects i have had. Looking for exciting challenges and opportunities that come my way. If you feel like we can make something better, feel free to reach out to me.

Experience

Web Developer

Favourite Doctor

Jan 2022 - Present (5 months +)

Software developer intern

Sophia ERP Limited

Apr 2021 - Oct 2021 (7 months)

1. I developed web applications using ASP.NET(VB.NET) and Microsoft SQL
2. I researched and developed teaching materials and user guides for some of the software applications made by Sophia ERP Limited.
3. I taught students how to create websites with HTML, CSS and Bootstrap.
4. I taught students about cloud computing and deploying web applications on Microsoft Azure.
